CONTENTS

Volume 47 (1990)

Evaluation of high performance liquid chromatography (HPLC), enzyme linked immunosorbent assay (ELISA) and particle concentration fluorescence immunoassay (PCFIA) methods for the screening, quantitation and pharmacokinetic study of furosemide in horses 1–15
by A.K. Singh, C. McArdle, M. Ashraf, K. Granley, U. Mishra and B. Gordon (St. Paul, MN)

Wernicke's lethal encephalopathy in voluntary, total, prolonged fasting 17–20
by G. Falzi and E. Ronchi (Milan, Italy)

Gas chromatographic determination of cresols in the biological fluids of a non-fatal case of cresol intoxication 21–29
by M. Yashiki, T. Kojima, T. Miyazaki, F. Chikasue and M. Ohtani (Hiroshima, Japan)

Dispersion of firing discharge residues using a modified maxwellian model 31–37
by C. Bhattacharyya (Chandigarh, India)

Deaths in women of reproductive age and relationship with menstrual cycle phase. An autopsy study of cases reported to the coroner 39–57
by P. Vanezis (London, UK)

Stain analysis using oligonucleotide probes specific for simple repetitive DNA sequences 59–70
by L. Roewer, P. Nürnberg, E. Fuhrmann, M. Rose, O. Prokop and J.T. Epplen (Berlin, GDR and Martinsreid, FRG)

GC polymorphism detected in human urine by isoelectric focusing and immunoblotting 71–77
by R. Iida, K. Sawazaki, Y. Ikehara, T. Yasuda, K. Mizuta and K. Kishi (Fukui, Japan)

Detection of human hemoglobin a (HbA) and human hemoglobin F (HbF) in biological stains by microtiter latex agglutination-inhibition test 79–89
by Y. Itoh and S. Matsuzawa (Tokyo, Japan)

Traumatic rupture of intracranial vertebral artery due to hyperextension of the head: Reports on three cases 91–98
by T. Miyazaki, T. Kojima, F. Chikasue, M. Yashiki and H. Ito (Hiroshima, Japan)

Diary of Future Events 99–100

Fourier analysis of the forehead shape of skull and sex determination by use of computer 101–112
by M. Inoue (Yonago, Japan)

Evaluation of a commercial radioimmunoassay kit for the detection of lysergide (LSD) in serum, whole blood, urine and stomach contents 113–121
by D. Altunkaya and R.N. Smith (London, U.K.)

Avian vitreous humor concentrations of inosine, hypoxanthine, xanthine, uric acid, uracil and uridine as influenced by age and sex: their relevance as indicators of ante-mortem hypoxia 123–127
by E.E. Gardiner, R.C. Newberry and J.-Y. Kent (Agassiz, Canada)

Metabolism and diuretic effect of furosemide: development of protocols for the regulation of furosemide medication in horses 129–145

by A.K. Singh, C. McArdle, M. Ashaf, U. Misha, S. Driffus, K. Granley, B. Gordon and D. Weiss (St. Paul, MN)
Analysis of the ageing processes in hashish samples from different geographic origin 147–155
by G. Martone and E. Della Casa (Napoli, Italy)
Immunofluorescence demonstration of digoxin in human myocardial tissue and isolated rat cardiac myocytes with monoclonal antibodies 157–163
by P. Sótonyi, E. Somogyi, J. Rajs, M. Sundberg and B. Andersson (Budapest, Hungary and Stockholm, Sweden)
An improved thin-layer chromatographic method for the detection and identification of cannabinoids in cannabis 165–171
by K. Lavanya and T.R. Baggi (Hyderabad, India)
Routine phenotyping of native and desialyzed α2HS-glycoprotein from blood stains 173–180
by A.S. Thomas and J.C. Aaskov (Queensland, Australia)
Cocaine and fetal death 181–189
by I. Morild and M. Stajic (Bergen, Norway and New York, NY)
Diary of Future Events 191–193
Aberrant radioimmunoassay results for cannabinoids in urine 195–205
by D. Altunkaya and R.N. Smith (London, UK)
Electrical excitability of skeletal muscle postmortem in casework 207–227
by B. Madea and C. Henssge (Köln, FRG)
Hyperphosphatasia-osteoactasia detected during anthropological examination 229–235
by G. Bujdosó (Budapest, Hungary)
A modified Gustafson method of age estimation from teeth 237–247
by V.K. Kashyap and N.R. Koteswara Rao (Hyderabad, India)
The distribution of damage defects among characters of printwheel typing elements 249–259
by M.J. Allen and R.A. Hardcastle (Birmingham, UK)
Lewis typing of human saliva stains by enzyme-linked immunosorbent assay (ELISA) using monoclonal anti-Le^a and anti-Le^b antibodies 261–268
by T. Takatori, Y. Tsutsubuchi, K. Terazawa, M. Nagao, H. Akabame and H. Mikami (Sapporo, Japan)
The zinc test as an alternative for acid phosphatase spot tests in the primary identification of seminal traces 269–275
by P.J. Hooft and H.P. van de Voorde (Leuven, Belgium)
Detection of pseudoecgonine and differentiation from ecgonine in illicit cocaine 277–287
by J.F. Casale (Raleigh, NC)
The labelling of gunpowder: An approach to improve gunshot residues determination 289–295
by A. Brandone, F. De Ferrari, P. Pelizza and M. Signori (Pavia and Brescia, Italy)
Diary of Future Events 297–299
Subject Index Volume 47 301–304
Author Index Volume 47 305
